ResumeScheme Project Requirements

User navigates to ResumeScheme.com on a browser to access the app.

The homepage displays the logo, text about ResumeScheme, log in / register buttons.

A registered user presses log in at the homepage to access the dashboard.

If the login button is pressed, the login form is displayed for the user to fill email and password.

If login is valid, the user is directed to the dashboard.

A visiting user presses Register button to sign up as a job seeker or an employer

If the register button is pressed, a signup form is displayed.

Job- seeker part:

The job-seeker fills the signup form, if the fields are valid, the job-seeker is registered and logged in to a dashboard.

If a job-seeker has not uploaded their resume, the dashboard prompts them to upload a resume.

If a job-seeker has uploaded a resume, the resume is scanned, the dashboard displays details of the resume so that the user can make changes or confirm it is right.

The dashboard displays the user profile tab, Jobs applied tab, Job Recommendations tab, logout button.

The user profile tab displays the user details, settings and saved jobs.

The job-seeker clicks the Job Recommendations tab to view a list of jobs that have been matched with their percentage match.

A job-seeker selects a job recommendation to apply for it, delete recommendation, or save it.

If the delete button is pressed, the recommendation is removed from the list.

If the save button is pressed, the recommendation is added to Saved on the user's profile for future access.

If the apply button is pressed, the job-seeker's resume is submitted to the employer, the job listing is displayed in the Jobs Applied For tab.

If the logout button is pressed, the user is redirected back to the home page.

Employer part:

The employer fills the signup form, if the fields are valid, the employer is registered and logged in to a dashboard.

The dashboard displays the user profile tab, My job listings tab, "create new listing" button, logout button.

The user profile tab displays employer details and settings that they can customize.

If the employer clicks "create a new listing", a form to create a job listing that includes: title, position, description, requirements, locations, listing "due" date, and "post job" button is displayed.

The employer clicks "post job" to submit the job for ResumeScheme to find applicants, the listing is added to My job listings tab.

My job listing tab shows a list of jobs that the employer posts if a job is selected, the tab shows applicants button, if the applicant button is clicked, the tab shows percentage match, resume and applicant contact info.

If the logout button is pressed, the user is redirected back to the home page.
